

HYPER-SECURE FILE SHARING AND DATA GOVERNANCE

FOR THE MIDDLE EAST

FILECLOUD

WWW.FILECLOUD.COM

Hyper-Secure & Streamlined Content Collaboration

FileCloud is an enterprise file sharing, sync, and content collaboration platform that facilitates secure file storage and management. It has on-premises, cloud, and hybrid deployment options, allowing enterprises to have full command over their valuable data assets.

Key FileCloud Features

Secure File Sharing

- File encryption built in
- Ransomware protection
- SSO, 2FA, SIEM integration

Life Cycle Management

- Control over retention & archival schedules
- Intelligent content governance

Data Residency

- Flexible deployment
- PDPL best practices template
- Detailed analytics & alerts

Compliance

- Compliance Center with dashboard
- AI Content Classification
- Granular audit logs

AI Content Classification

- AI classifies your content
- Inbuilt search patterns & metadata sets

e-Signature

- User-friendly e-signatures
- Built-in document tampering protection

DLP & DRM

- Smart data leak prevention
- Real-time trigger alerts
- Digital Rights Management

Unstructured Data Governance

- Flexible storage
- Granular file permissions
- Easy integration

Workflow Automation

- Easy, no-code tool
- Automated triggers
- Easy workflow tracking

Zero Trust File Sharing

- Fail-safe encryption for sensitive documents
- Exclusive control over critical data

FileCloud: Next-Gen Secure Content Collaboration

Robust Security

Cybersecurity is a top priority in the Middle East, as digital transformation continues. FileCloud has robust data loss prevention, ransomware protection, and malware screening to protect sensitive data.

Secure File Sharing

FileCloud is tailored to the needs of Middle Eastern business, with Hijri Calendar and Arabic language support fully built in. Region-specific technical support is a FileCloud specialty.

Data Sovereignty

Data sovereignty is a major concern in the Middle East, with governments enacting privacy laws requiring data to remain within national borders. FileCloud has both on-premises and hybrid cloud solutions to enable in-country residence.

Vision 2030

Saudi Arabia's Vision 2030 is a framework for digital transformation. FileCloud supports this framework, with its deep attention to today's requirements for robust security, data residency, and diverse deployment options.

Compliance with Industry Regulations

Strict regulations govern sectors like finance, government, and healthcare in the Middle East. Saudi Arabia's PDPL sets high standards for privacy. FileCloud provides robust tools to simplify adherence to these standards.

"As someone who has been a customer of FileCloud for a few years, I can say they have consistently exceeded my expectations in terms of both product quality and customer service".
