• Customer Feedback

Across Gartner, G2 and Capterra

filecloud.com

"We needed a solution for **safely passing files** to our vendors, customers and partners. FileCloud checked the box for **this requirement and so much more**. We have since identified other features to leverage within the software to provide a **more rounded experience** for our users as well as those who we are sharing files with."

- IT Manager, Manufacturing Industry.

"We use FileCloud for secure file sharing for all of our customers. It is **easy to deploy, setup, and maintain**. I also use FileCloud to **transfer secure documents** to and from vendors and clients. We have many clients who are required to be **CMMC or HIPPA** compliant, both of which **we've accomplished through FileCloud**."

- Project Manager, IT Services.
