

Data Intelligence & Governance for Unstructured Data

Visibility and control over network shares and cloud storage (S3, Azure, etc.)

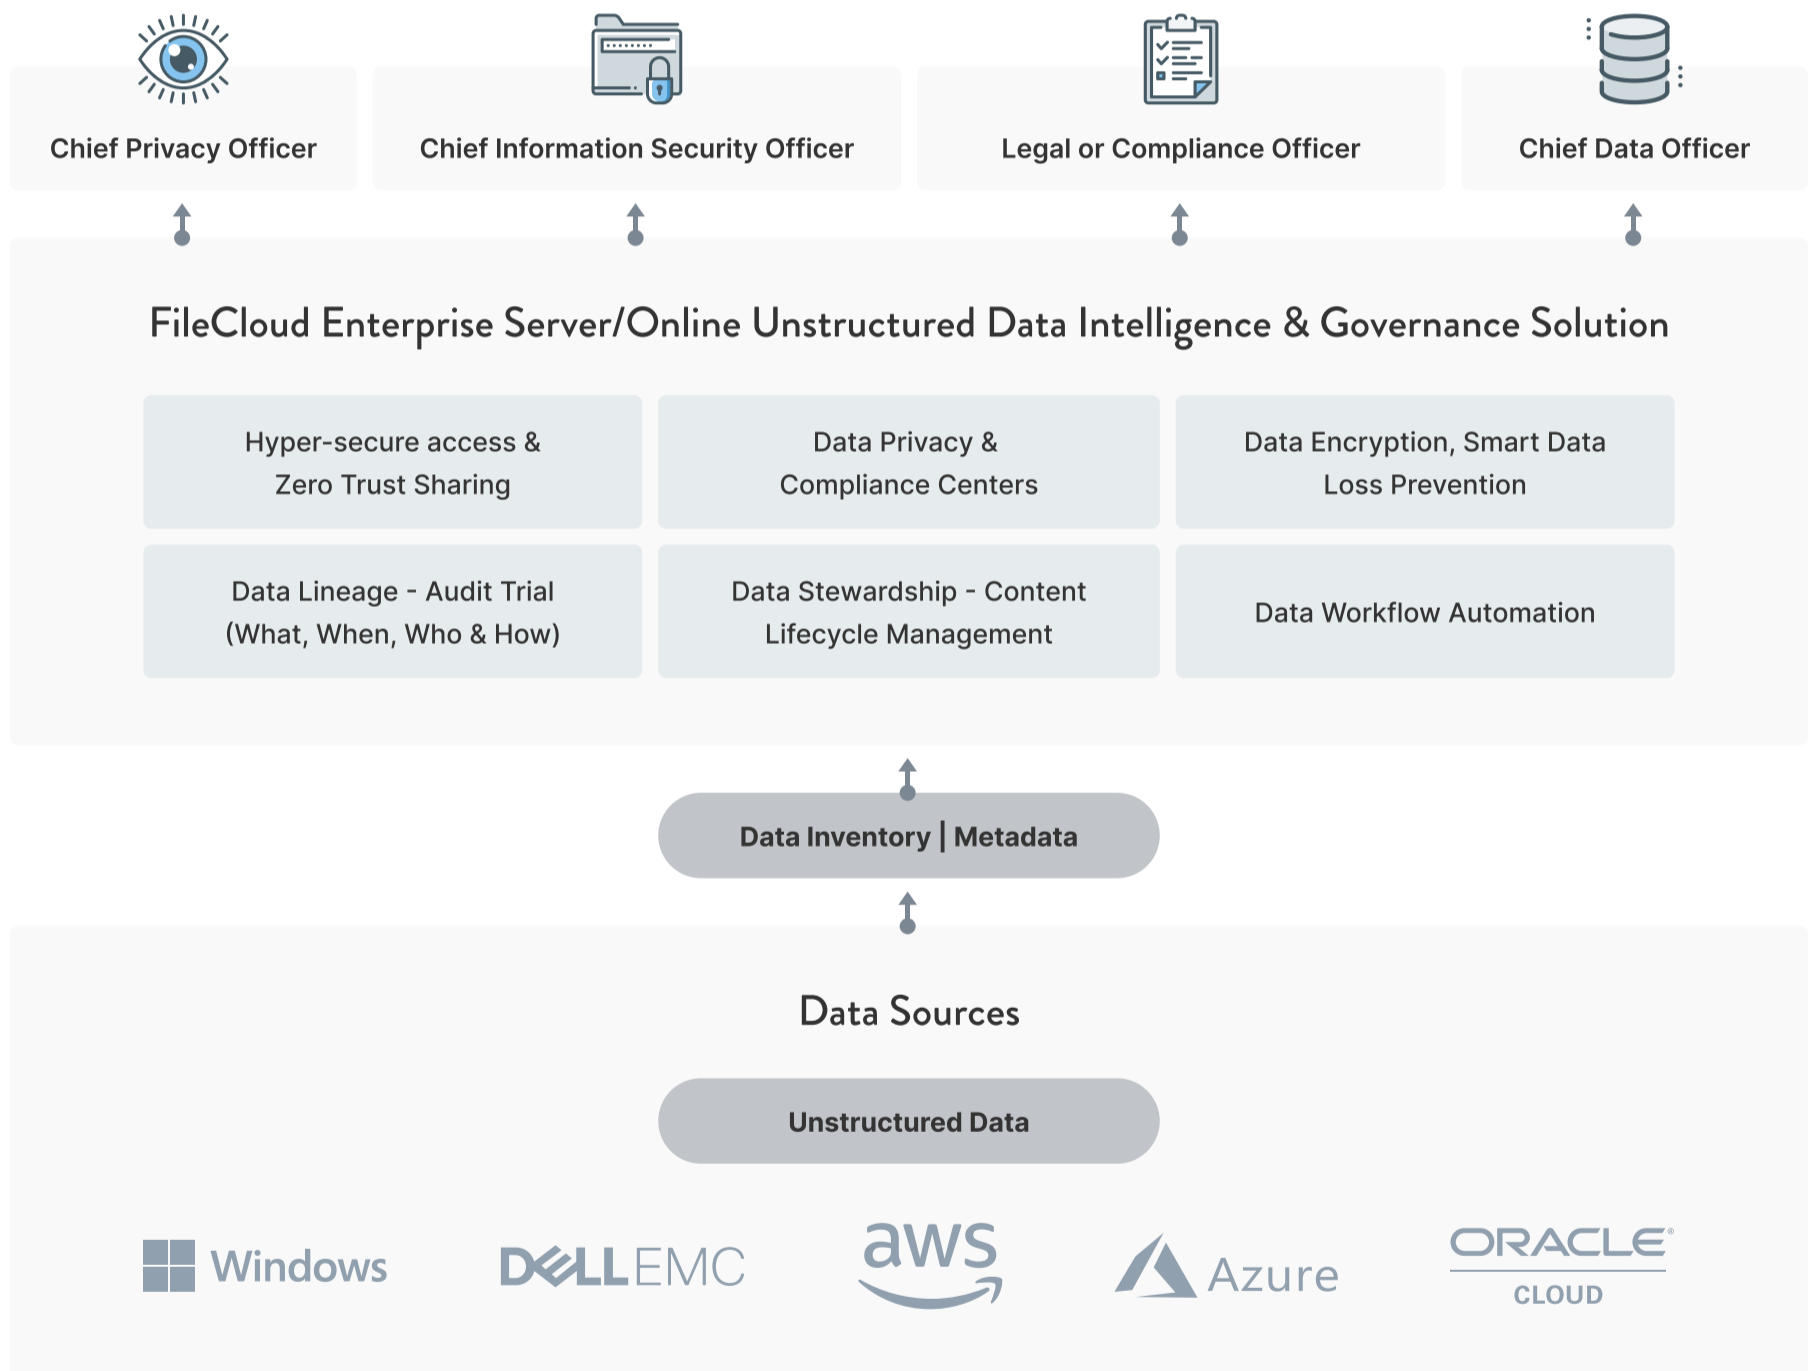

“In the face of this data deluge, we have seen the emergence of a new software category [...] which we call data intelligence and governance (DI&G). We prefer this term because it encompasses both **data visibility** and **data control**—which should be the prime objectives of any modern DI&G platform.”

– “Data Intelligence and Governance Market”

William Blair Equity Research Report

FileCloud’s out-of-the-box Data Governance Solution

- ✓ Bring together disparate silos to capture the full economic value of data.
- ✓ Address expanding global privacy and compliance regulations.
- ✓ Manage data throughout the content life cycle.
- ✓ Implement Zero Trust File Sharing and secure file collaboration from any device.
- ✓ Leverage hyper-secure data platform to protect data against proliferating risks.

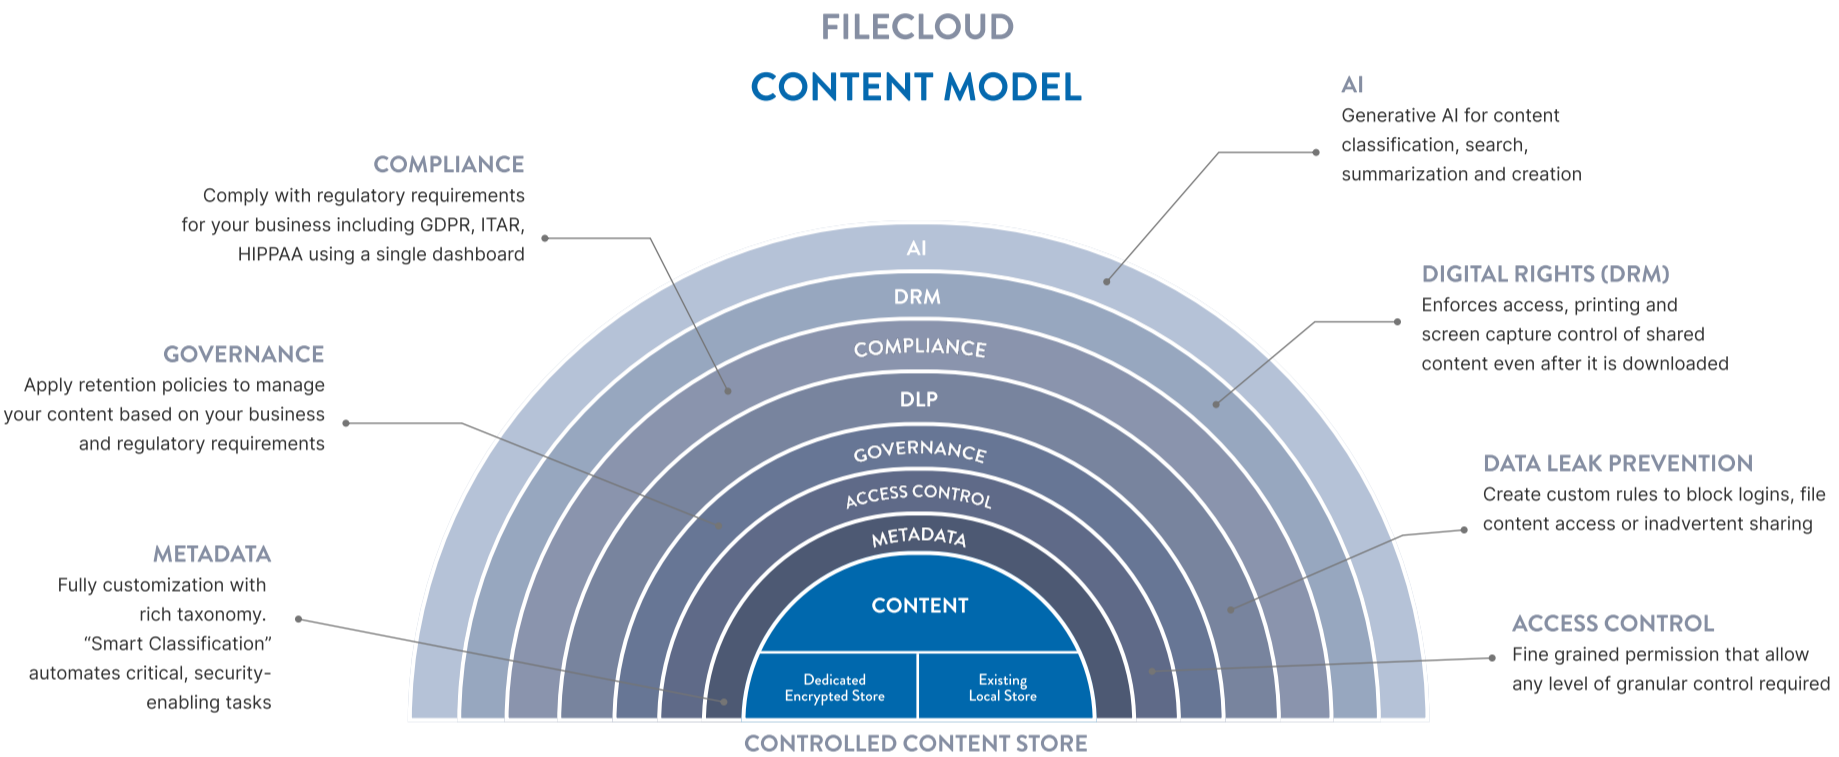

Optimize Content Security, Compliance, and Governance

"Metadata sits the heart of the DI&G market, enabling intelligent data discovery and classification."
- William Blair Equity Research Report

Enterprises often collect and work with unstructured data – files and folders uploaded to an environment; FileCloud provides the infrastructure necessary to organize unstructured data, starting with metadata.

Governance Objective	FileCloud Enablement
Bring visibility to unstrucunstructured data.	Metadata (default and custom) Content search
Automate content workflows and metadata management.	Smart Content Classification, Workflow Automation Builder
Ensure only authorized users can view, modify, and exfiltrate data.	Access controls, Two-factor Authentication (2FA), Single Sign-on (SSO), AD/LDAP integration
Enable data stewardship and lifecycle management.	Retention policies, Smart Data Leak Prevention
Meet data privacy and compliance requirements.	Compliance Center (GDPR, HIPAA,ITAR), In-depth white papers (CMMC, NIST, FINRA+)
Track data lineage and reveal insights on file and user activity.	Pre-built and Custom Reports, Comprehensive Audit Logs, Dashboard Analytics, Remote Device Management
Facilitate secure collaboration and file sharing.	Zero Trust File Sharing SM , Encryption (data at rest and in transit), Granular Access Permissions
