

Digital Trust 360: Building Data-Driven, Cyber-Secure Institutions

Reimagining File Sharing for the Modern Campus

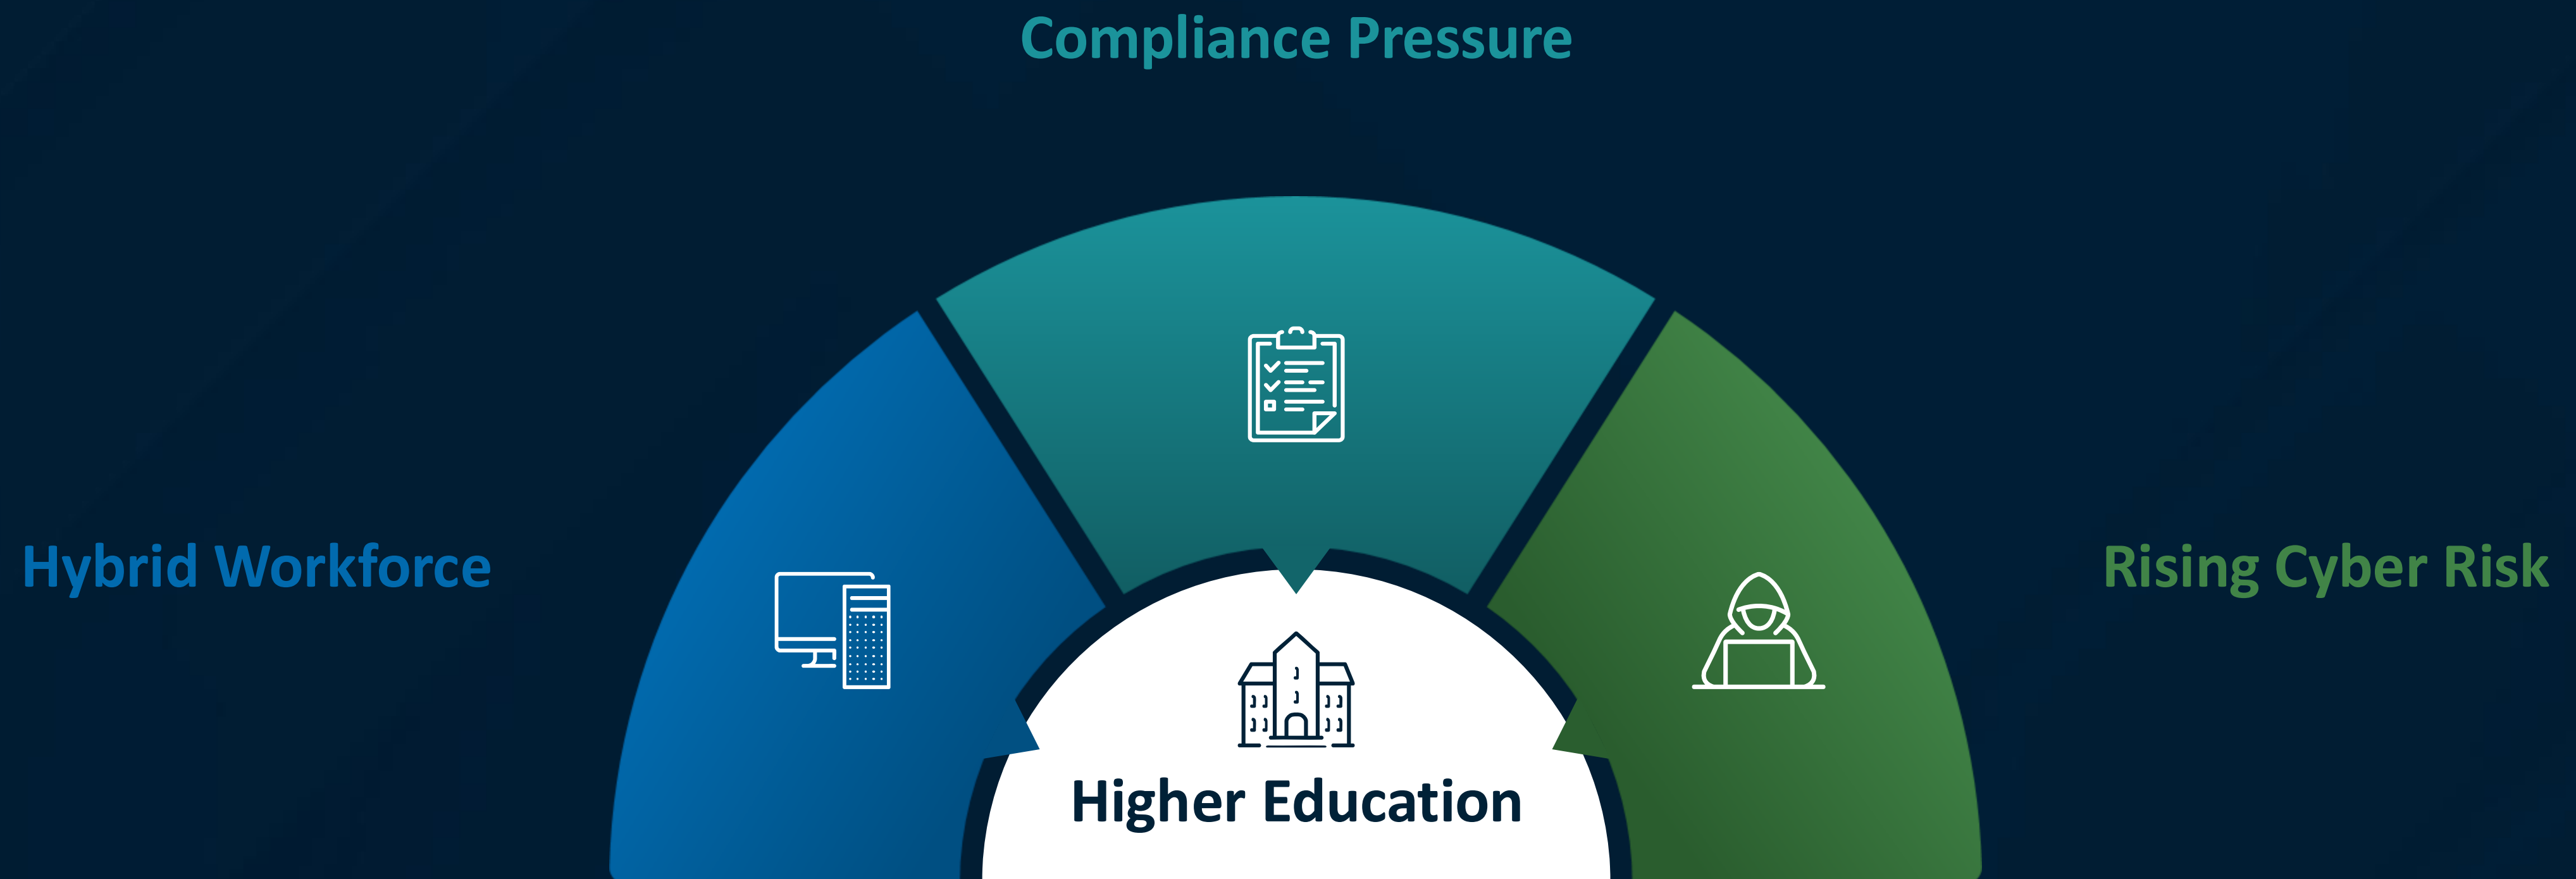

FILECLOUD

The Landscape

A Data Environment That's More Complex — and Riskier — Than Ever

Why Digital Trust Matters

Trust is the Foundation For Transformation.

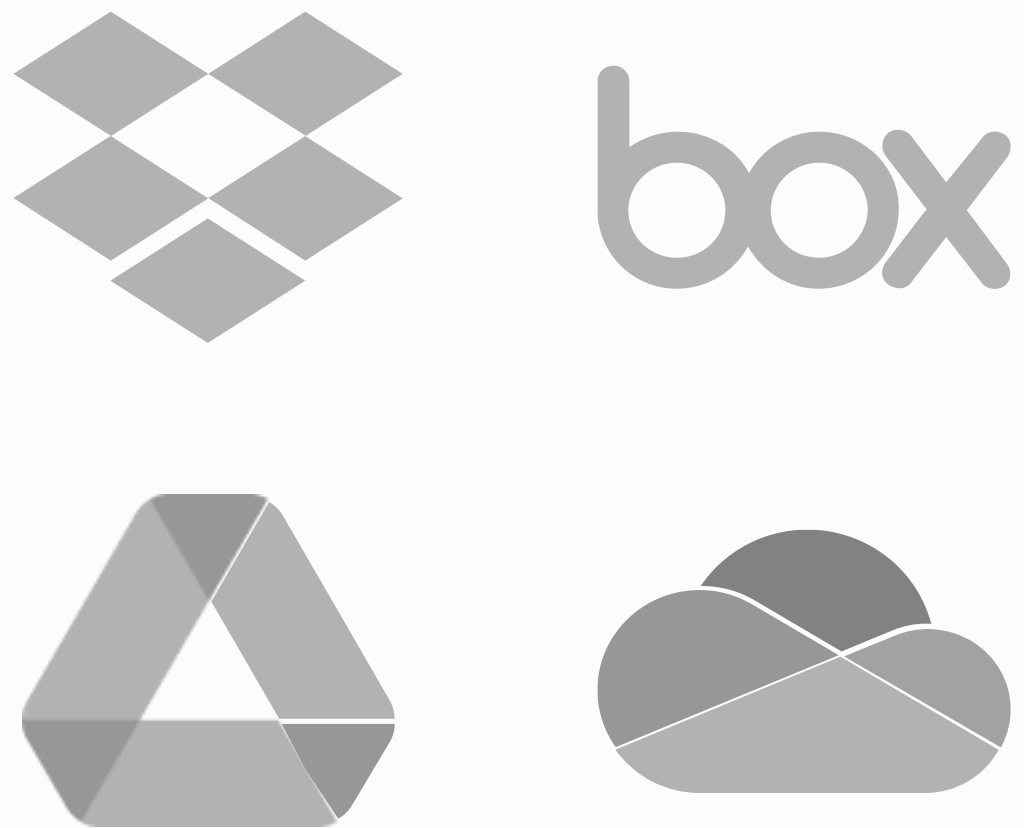

The File Sharing Gap

When You Lose Control of File Sharing, You Lose Control of Risk and Governance

The Limits of Common Cloud Tools

Why Dropbox, Box, Google Drive and OneDrive Don't Close the Gap

- Consumer-first tools, not built for EDU governance
- Limited data residency controls
- Weak audit/compliance features
- Dependence on SaaS = no private deployment option

The Big Squeeze on Education Storage

- **Google Workspace for Education** – 100 TB pooled across institution (no longer unlimited).
- **Microsoft 365 Education** – Announced new storage limits, reducing OneDrive + SharePoint capacity.
- Both shifting from **unlimited/free** → **capped/paid** models.

⚠ Organization storage full - Your organization exceeded its 100 TB of storage

☁ Workspace Storage

103 TB of shared 100 TB (103%) used ⓘ

● Google Drive ● Google Photos ● Gmail ● Chat

Usage

102 TB of 100 TB used

Total storage used

102 TB of 100 TB

■ OneDrive ■ SharePoint ■ Exchange

The Digital Trust 360 Framework

A Proven Model for Governing and Protecting Institutional Data

Centralize

Defend

Complete Governance Across the Content Lifecycle

Where FileCloud Fits

One Platform, All Deployment Options: Built for Education's Hybrid Reality

On-Premise & Private Cloud Deployment

Full Control of Data Residency and Governance

On-Premises

Full IT control, local compliance

Private Cloud

On-premise with private cloud scalability

Making Enterprise-Grade File Governance Affordable for Education

Case Study: CalArts

How CalArts Strengthened Governance
While Accelerating Creativity
