

Customize FileCloud with HIJRI Calendar!

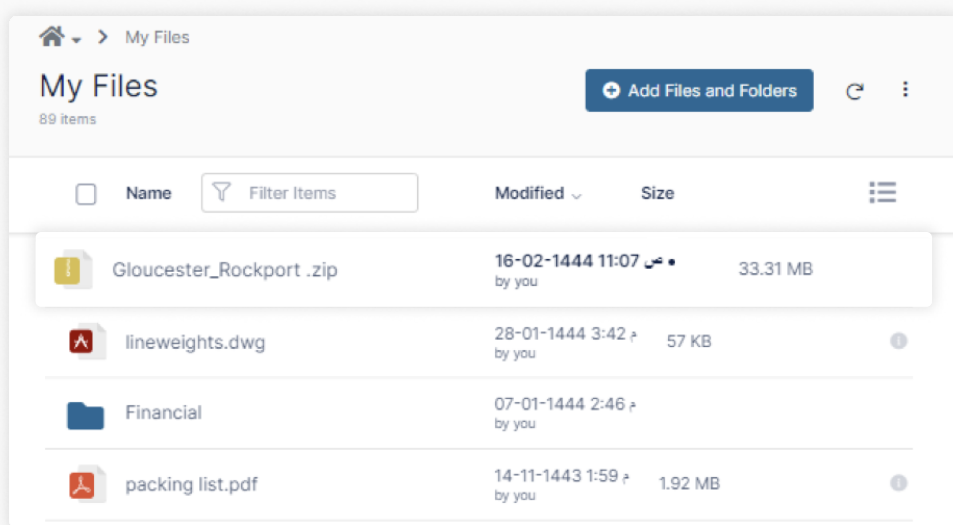

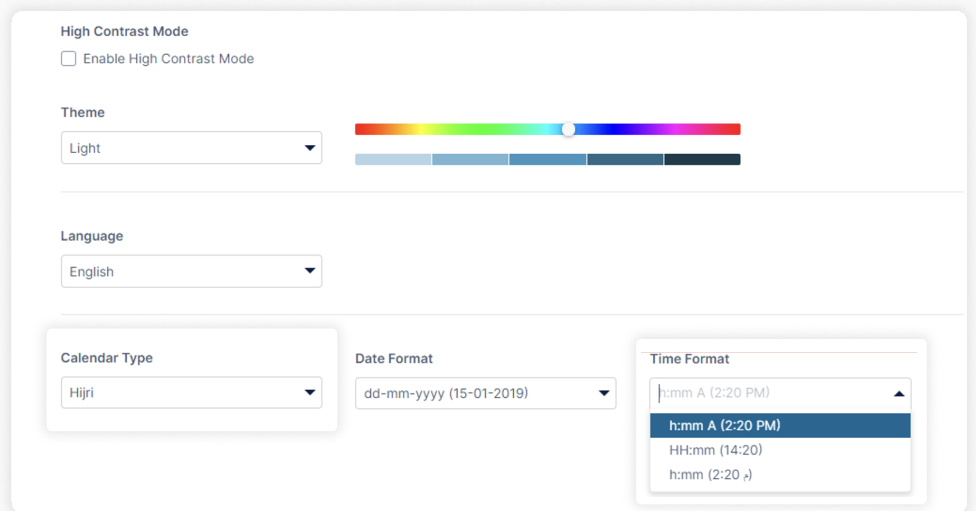

The Hijri calendar is one of four major calendars currently in use worldwide (besides the English/Gregorian calendar). These four include the Miladi, Hijri, Chinese, and Persian calendars. The Hijri calendar is the official calendar of the Kingdom of Saudi Arabia.

With a global society, many users would prefer the calendar in their tools/apps to line up with the calendar they use in their day-to-day lives, which is why FileCloud now has a Hijri Calendar feature. Users and admins can now easily change their date/calendar format with our Hijri Calendar **Customization Option**.

This option allows FileCloud users to switch from an English/Gregorian calendar to a Hijri calendar, to really make FileCloud their own.

No more translating business or file information from Gregorian to Hijri and back again – now users can collaborate in FileCloud with the time format that works for them.

To display dates in Hijri format in the FileCloud user portal (as well as FileCloud Drive) all admins and users have to do is adjust their settings (Settings > Misc > General) and change Calendar Type from the default of Gregorian to Hijri.

When Hijri is selected, the date and time format also change.

Users may override any of **these settings** through the Settings screen in the user portal.

FileCloud doesn't stop at customized calendars. Our customers can also reinforce connections with global clients and employees via translated user and admin portals (available in Arabic, Dutch, French, German, Italian, Portuguese, Spanish, Chinese – Simplified, and Russian).

Within FileCloud, the following options can be customized:

- User Interface
- Logos
- RSS Feed Role-Based Access Controls (RBAC)
- Calendars
- Email Templates
- Customized URL
- Colors
- Company Messages
- CSS Files
- Terms of Service

Activate your FileCloud Account Today!
