

20.1 Change Sync Folder Location

FileCloud Sync app stores synchronized files at a default location

The default location of this sync folder is listed below :

- **Windows:** C:\users\<user>\My Documents\FileCloud
- **Mac OSX:** {HomeDir}\FileCloud
- **Linux:** {HomeDir}\FileCloud

To change the sync folder, open "Settings" option and then click on the "Settings" tab.

You can also change this by overriding the **syncclientconfig.xml** file

The file is available at the following location

- **Windows:** %APPDATA%\FileCloudSync\syncclientconfig.xml
- **Mac OSX:** {HomeDir}\syncclientconfig.xml
- **Linux:** {HomeDir}\syncclientconfig.xml

Note

When you are trying to specify an UNC path in **syncclientconfig.xml** file, you must enter the path like this:

\\\\\\<URL or IP address>\<path>

Example:

\\\\\\10.0.0.1\<path>

Note the use of 4 slashes before the URL or IP Address.

To change the default location,

1. Stop the FileCloud Sync App
2. Change the syncclientconfig.xml file, and modify the "**value**" key of **syncfolderlocation** entry to the path you want (For example, if you want synchronized files to store at H:\data <value>DEFAULT</value> to <value>H:\data</value>. WARNING: If you set incorrect paths, sync might not work properly.
3. Make sure to copy all the files (if you had synced files earlier) from the old sync folder to the new location e.g. H:\data\FileCloud
4. Restart the Sync app

```
<?xml version="1.0" encoding="UTF-8" ?>
<variantrow>
  <rowentry>
    <name>syncclientlocation</name>
    <type>string</type>
    <value>DEFAULT</value>
  </rowentry>
  <rowentry>
    <name>syncfolderlocation</name>
    <type>string</type>
    <value>DEFAULT</value>
  </rowentry>
</variantrow>
```
