

20.1 Sharing Folders

You can share a folder many ways.

Publicly

- Does not require the user you want to share with to have a FileCloud account.
- Share a folder with everyone with or without restrictions.
- Share a folder with everyone and require a password.

Privately

- Does require the user you want to share with to have a FileCloud account.
- You can invite someone to create a FileCloud account so you can share with them.
- Share a folder with all FileCloud users with or without restrictions.
- Share a folder with specific FileCloud users with or without restrictions.

In the User Portal, you can click on the root folder, *My Files*, and select *Share*. This is a security threat and should not be allowed.

In FileCloud Server version 19.1 and later:

- In the User Portal, when you click on the root folder, *My Files*, you will no longer have the Sharing option!

What do you want to do?
