

20.1 Video of of Editing Metadata

 Metadata support is available starting from FileCloud 18.1.

You can manage data that provides additional information about files and folders available in FileCloud Server using **Metadata**.

The screenshot displays the FileCloud web interface. On the left, there is a navigation sidebar with sections for BROWSE, SHARING, SHORTCUTS, SEARCH, MEDIA, and MISC. The main area shows a file browser view for 'My Files' containing a folder named 'Website images' with a timestamp of 'May 11, 2018 3:27 PM'. On the right, a metadata editing panel is open, featuring various input fields and dropdown menus. The fields include: Type (Default), Invoicing (with a Remove button), Status* (New), Net Value* (0), Sales Tax (n/a), Total* (0), Payment method (Card), Payment Due By (05/11/2018), and a Paid checkbox. Below these are text input fields for 'Test' and 'Test_int', each followed by a Save button.
