Files that don't sync

Special Characters

Tonido Sync doesn't sync some files with characters that are incompatible with some operating systems.
Starting with Tonido Sync Build 18199 : Files with these characters are not synced.
Please rename them to something more suitable for use across multiple operating systems.

- The * character
- The < character
- The > character
- The : character
- The \ character
- The / character
- The | character
- The ? character
- The * character
- The ~ character
- Files with two "." characters in succession

The following file names are also not synchronized

- tonido.db
- Thumbs.db
- desktop.ini
- Anything ending with .tmp
- .tonidocache
- Anything starting with Conflict_
- sync.ico
- .ds_store

Long Filenames or Paths

Windows Operating Systems only allows files and folder names of around 260 characters or less. So paths longer than those are not synced.
