

OpenSUSE

Tonido On OpenSUSE

Steps

1. Download and double-click the RPM for Fedora 12 (it works fine on OpenSUSE). Type in the root password to install it.
2. Open a Terminal and type "sudo /etc/init.d/tonidod start".
3. Go to "<http://localhost:10001>" in your browser. Tonido should be running.
4. Update Tonido to the latest version. In a terminal, type "sudo /etc/init.d/tonidod restart" when you are prompted to restart it.
5. (Optional) To start Tonido on boot, open a Root Terminal and run "sudo /sbin/chkconfig tonidod on".
6. (Optional) Open port 10001 in Firewall (Security and Users > Firewall > Allowed Services > Advanced).
7. (Optional) Forward port 10001 to the machine where Tonido is installed.
