## **OpenSUSE**

## Tonido On OpenSUSE

## <u>Steps</u>

- 1. Download and double-click the RPM for Fedora 12 (it works fine on OpenSUSE). Type in the root password to install it.
- 2. Open a Terminal and type "sudo /etc/init.d/tonidod start".
- Go to "http://localhost:10001" in your browser. Tonido should be running.
  Go to "http://localhost:10001" in your browser. Tonido should be running.
  Update Tonido to the latest version. In a terminal, type "sudo /etc/init.d/tonidod restart" when you are prompted to restart it.
  (Optional) To start Tonido on boot, open a Root Terminal and run "sudo /sbin/chkconfig tonidod on".
- 6. (Optional) Open port 10001 in Firewall (Security and Users > Firewall > Allowed Services > Advanced).
- 7. (Optional) Forward port 10001 to the machine where Tonido is installed.
