

Patch 20.2.2.12034

October 22, 2020

Patch 20.2.2 fixes these issues.			
Server Critical Update	S3 and Azure Uploads	CL-7433	An issue introduced in the 20.2.2.12030 Oct 21, 2020 release caused potential data loss for uploaded files larger than 20MB with S3 or Azure as the managed storage backend. This has been fixed.
Server	2FA	CL-7370	A new setting has been added to handle settings for 2FA when a user is promoted to Admin, and 2FA is enabled for Admins. If the setting is not enabled, the 2FA method set for the user account is used for the Admin account. If the setting is enabled, the 2FA method set for administrator's is used for the Admin account. See Managing Admin Users .
Server	AD	CL-7424	A problem preventing the AD group Automatic Sync Option and Group Name from being saved has been fixed.
Server	AD	CL-7418	In AD, if a user had a mixed case username, email login was not working. This has been fixed.
Server	Cloudupdate Tool	CL-7432	An issue causing the Cloudupdate tool to overwrite the SimpleSAML config file has been fixed.
Server	Download	CL-7386	A problem causing a delay when a publicly shared file is downloaded has been fixed.
Server	Email	CL-7422	An issue preventing emails processed from the backend queue from being sent has been fixed.
Server	Logging	CL-7439	A problem preventing logs from being written to custom paths has been fixed.
Server	Network Folders	CL-7423	A problem causing large file downloads from Network Shares has been fixed.
Server	Network Folders	CL-7391	An issue preventing Network Folders from appearing in the new user interface has been fixed.
Server	Recaptcha	CL-7377	A problem causing Recaptcha to fail when 2fa is enabled has been fixed.
Server	S3	CL-7422	An issue causing downloads from sites using Digital Ocean S3 to fail has been fixed.
Server	Salesforce	CL-5841	FileCloud has been integrated with Salesforce.
Server	Shares	CL-7367	A problem preventing shares to new limited users when a license quota is fully used has been fixed.
Server	Translations	CL-7396	The Russian translation file has been updated and contains translations.
Server	Translations	CL-7397	A problem causing the Russian translation file to work incorrectly in the new UI has been fixed.
Server	Translations	CL-7408	A problem with the Dutch translation file has been fixed.
Server	Translations	CL-7454	"Forgot Password" was not being translated; this has been fixed.
Server	User import	CL-7477	User import with CSV files was failing when status and verified values were not set. This has been fixed.
Server	User portal interface	CL-7360	A problem causing the system to ignore the setting for hiding the account summary has been fixed.

Server	User portal interface	CL-7407	An issue causing folders with a # in the display name to appear as empty (and without the portion of the display name following #) has been fixed.
Server	Users	CL-7413	An issue causing FileCloud to omit portions of Display Names that follow a space when importing users by csv file has been fixed.
Server	Video Files	CL-7372	When single file share previews were enabled, shared video files were not playing in previews for both the old and new ui's, but this has been fixed.
Outlook Add-in	Outlook	CL-6326	The version number is now displayed during Outlook Add-in installation.
