

# FileCloud Alerts

FileCloud Alerts are available in FileCloud's Admin portal.

This page tracks all unhandled exceptions, system error messages generated in the FileCloud server. The number of alerts are shown in the Dashboard and the Alerts page will show detailed information about the various errors encountered.

Depending on the error, you might need to take steps to correct the problem. For example, if alerts indicate that system is frequently running out of memory, then system memory may need to be increased.

To view alerts:

1. Log into the [Administration portal](#).
2. On the left navigation panel, click *Alerts*.

The following view shows errors detected by FileCloud File Content Heuristic Engine.

The screenshot displays the 'Manage Alerts' interface in the FileCloud Admin portal. On the left is a navigation sidebar with categories like HOME, USERS/GROUPS, MANAGE, DEVICES, MISC, SETTINGS, and CUSTOMIZATION. The main area shows a table of alerts with the following data:
