

Adding additional pages to the wiki

To add an additional wiki page:

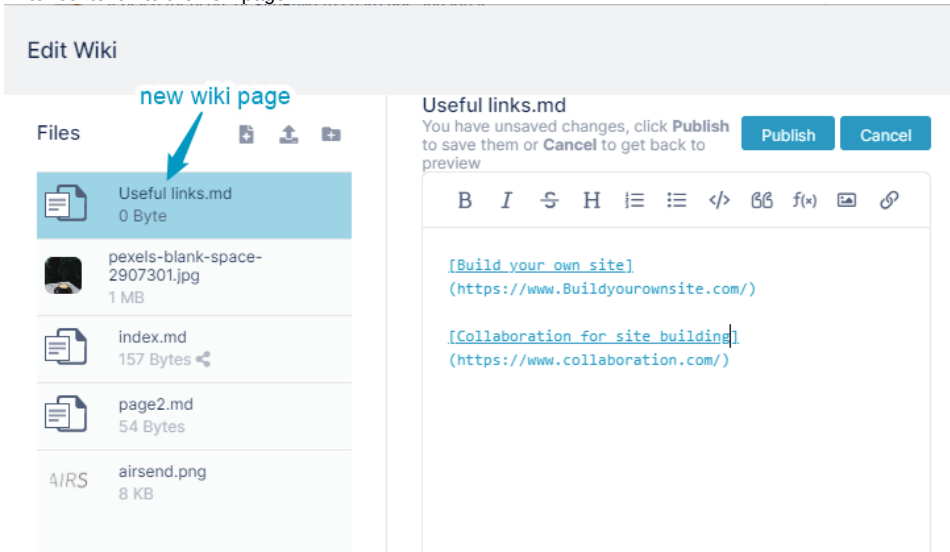

1. [Open the wiki editor.](#)
2. In the Files panel on the left of the Wiki editor, click the **Create a page** button.

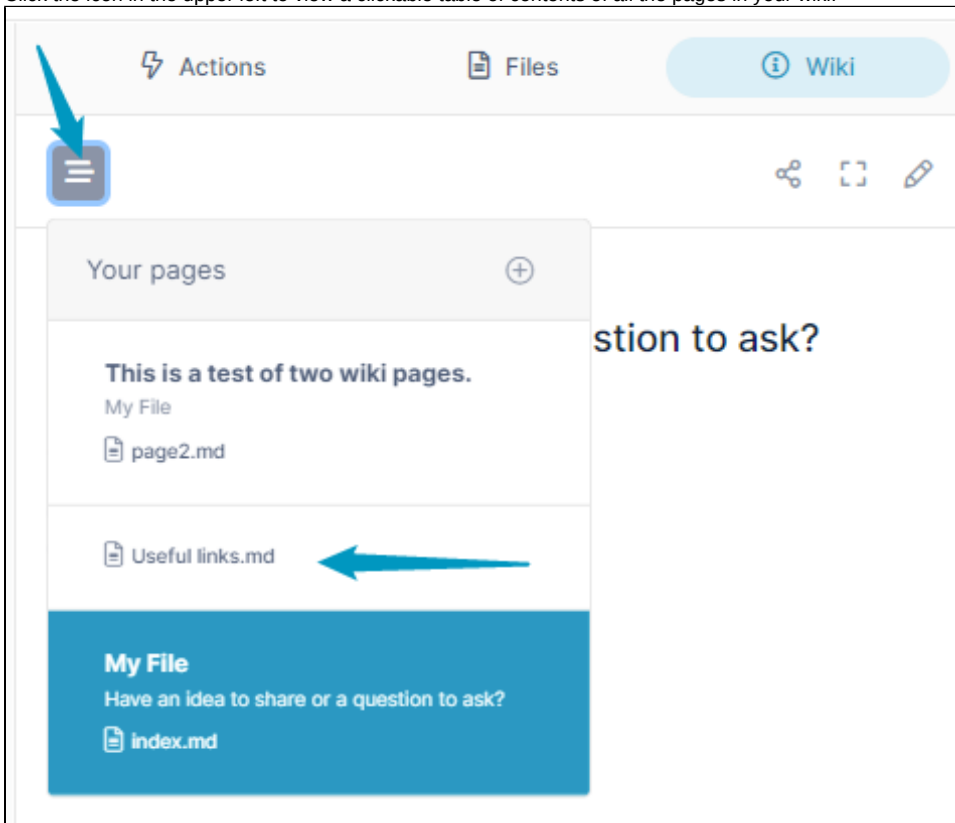

An **Add Page** dialog box opens.

3. Enter a file name. The extension will always be **.md**.
4. Click **Create Page**.
The file for the new page is listed in the Files panel, and is opened for edit in the central panel.

5. Enter content into the new page.

6. Click **Publish**, and close the dialog box.
7. Click the Wiki tab again.
8. Click the icon in the upper left to view a clickable table of contents of all the pages in your wiki:

9. You may also want to [add links](#) on each page of your wiki to the others.
