

Actions in AirSend

Adding actions

In the Actions tab of the right panel, schedule actions or tasks to be completed. After you create an action, you can assign it to specific users, add a due date, or add subtasks. When an action is complete, check it to remove it from your list of incomplete actions.

Note: Your [member type](#) in a channel must be full collaborator or higher to add actions.

2. Disk of 2 TB

4. Main drive

2TB, 4K

15360 RPM

The main drive is a 2TB, 4K, 15360 RPM SATA drive. It is a high-performance drive that is suitable for use in a server or a workstation. It is a 2TB drive, which is a large capacity for a SATA drive. It is a 4K drive, which means it has a 4096 byte sector size. This is a good feature for high-performance applications. It is a 15360 RPM drive, which means it has a high rotational speed. This is a good feature for high-performance applications. It is a SATA drive, which means it is easy to install and use. It is a 2TB drive, which is a large capacity for a SATA drive.
