Adding a link to a file in a wiki page
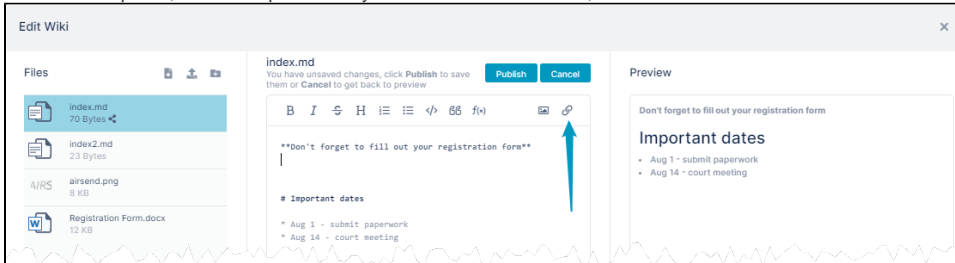

You can add a link to a file in a wiki page. The file must first be stored in the wiki by uploading to the wiki.

**To add the link using the image icon:**

1. Open the wiki editor
2. In the center panel, click the spot where you want to insert the link, and then click the link icon.

   A drop menu displays the options **Local Wiki File** and **External URL**.
3. Click **Local Wiki File**.

A Pick a File dialog box opens. It displays files that are currently stored in the wiki.
If you want to add a file to the wiki so that you can add a link to it, see Uploading files or folders to the wiki.

4. Select the non-image file that you want to link to.
5. Click **Pick File**.
Markup for the link appears in the text editor, and the formatted link appears in the Preview panel.

6. Change the **My File** text in the link placeholder to the text you want to appear for the link in the wiki.
