Member Types

Each member of a channel has a member type that defines their access within the channel. By default, when you add a member, its member type is Full Collaborator, but you may change it.

	Messaging access	Member access	Settings access (for settings, see Channel settings for a channel owner)	Files access (upload, download, move, delete)	Action access (add, delete, change status)	Wiki Access	Export channel	Close or delete channel	Leave channel
